MAC FORBES

Mac's career in the wine industry started in France when at the age of 18 he worked his first vintage. Returning to Australia, he studied at the Roseworthy Agricultural College in South Australia before going on to become winemaker at Mount Mary Vineyard, Lilydale Victoria. Mac's broad domestic and international experience has formed the basis of his wine philosophy now - to care for the land and plants to maximise plant and fruit health. He is passionate about producing wines that strongly reflect the personality of his vineyards. Today Mac works with his dedicated team and with nine small vineyards in the Yarra Valley and Strathbogie Ranges. Their aim is to encourage life in their soils and seek to pick balanced fruit so that the resulting wines convey both region and variety with clarity and detail.

How did it all start

When Hans was growing up on his parent's farm in Denmark, one of his favourite things was to go to the paddocks to look for tools from the Stone Age. So when he decided to move to Australia in 1990, it was only natural that he was drawn to opals when he came through Lightning Ridge and as such decided to give opal mining a go.

Lightning Ridge is renowned for the most expensive opal in the World: THE BLACK OPAL, and has also been named the official gem stone of New South Wales.

He met Helle, also from Denmark, who was on a 3 month holiday, and asked her to come to Lightning Ridge for an adventure. Being creative and artistic minded, she was quick to fall in love with the natural beauty of the opal.

In 2006 Helle started to design opal jewellery to sell in Europe along with a assortment of other opals.

In 2009 when one of very few opal cutting courses in Australia became available, both Hans and Helle seized the opportunity. Helle went on to also do the advanced cutting course and Hans became a certified cutter. She is now one of only a few female certified opal cutters and opal cutters.

All our Black Opals are mined by us, cut by us and we design our own
